Professional Summary

I'm a developer with 2 years of experience delivering digital experiences for major shopping center groups in Brazil and their customers. Skilled in web technologies such as JavaScript and TypeScript, and experienced with frameworks like React.js, Next.js, and Fastify, my goal is always to turn ideas into solid and impressive experiences. Currently, I've been working mainly on developing APIs with Node.js and TypeScript, as well as building websites that receive thousands of daily visits.

Technical Skills

- **Back-end:** Fastify, Typescript, Node.js.
- **Front-end:** React.js, Next.js, Typescript, TailwindCSS, Zustand, React Query, Tanstack Router, ZSA, Shadcn/UI.
- **Database:** Supabase, PostgreSQL, MySQL, Firebase.
- **Additional Skills:** Vercel, Git, Docker, PrismaORM, Kysely, PayloadCMS, Resend, Zod, Figma, Web performance optimization.

Languages

Portuguese - Native/Fluent; English - Advanced.

Professional Experience

Software Developer — IntranetMall

Jan/2025 - Present

- Automated an email delivery process by rewriting it in JavaScript, significantly improving performance and reducing error rates to nearly zero;
- Reduced application deployment time by 85% by optimizing the project's Docker image;
- Developed a JWT-based authentication flow using Fastify;
- Migrated an entire application from Next.js to TanStack Router;
- Automated database data ingestion and updates using information retrieved from an external API;
- Developed four frontend projects from scratch with a strong focus on performance using Next.js;
- Developed one multi-tenant frontend project from scratch using Next.js;
- Built UI components and replicated layouts based on Figma designs;
- Tech Stack: Next.js, React.js, Typescript, TailwindCSS, Fastify, Kysely, PayloadCMS, Vercel, Git, pnpm, Zod, ZSA, Zustand, Resend, Shadcn/UI, Resend, Docker;

Software Development Intern — IntranetMall

October/2023 - December/2024

- Updated a Next.js project from the Pages Router to the App Router;
- Created a project from scratch using Next.js on the frontend integrated with PayloadCMS;
- Contributed to improving website communication with external APIs;
- Collaborated in developing an API using Fastify;
- Assisted in building a real-time chatbot using Firebase;
- Tech Stack: Next.js, React.js, Typescript, TailwindCSS, Fastify, Kysely, PayloadCMS, Vercel, Git, PrismaORM, Firebase;

Projects

Sabor com Amor

May/2024

- The project is a web application that serves both as a virtual storefront and a CMS, allowing the store owner to manage the products displayed on the website;
- Tech Stack: Next.js, TypeScript, Supabase, React Query, Zod, TailwindCSS, Vercel e Git;

Education

Technology Degree in Systems Analysis and Development — Instituto Federal de São Paulo

January/2022 - December/2024

Certifications and Achievements

- AWS Academy Cloud Architecting - AWS Academy Graduate, 2024;
- Huawei ICT Competition 2024/2025 - Achieved 3rd place in the National Stage and qualified to LATAM Stage.
